GLASWAL™ FEATURES

API's GlasWal™ series is a stylish, interior storefront system that will add distinctive design and character to any environment. Designed for 1/2", 3/8" or 1/4" glass, GlasWal™ can be used in interior storefront applications as well as interior partitions, show windows and functional glass walls.

With our incredible selection of shapes, colors and finishes, you can create eye catching GlasWal™ designs in virtually any look you desire that will create lasting impressions and captivate your customers.

GlasWal™ extrusions, which have a 1/8" wall thickness and are stocked in 12' lengths, install quickly and easily with no exposed fasteners. Simply secure the header to the ceiling, the anchor to the floor, slide the base onto the anchor, and install the glass of your choice. Matching glass clips can be finished in any of our anodized or powder coat colors, ensuring they will enhance your GlasWal™ design and add that perfect finishing touch.

AVAILABLE OPTIONS

GlasWal™ is available in more than 70 anodized colors and finishes as well as over 500 powder coat colors. Brass, copper, muntz, and stainless steel clad finishes are also available. If you require a color or finish not shown in our catalog, just contact us as we are always adding new choices to our selection. If we currently don't offer exactly what you need, we can color-match it for you.

OPTIONAL FEATURES

Most all of API's products are available in virtually unlimited color and finish options, making it easy for you to carry your design theme throughout your entire storefront and interior area. So combine GlasWal™ with other products from API to create memorable designs and effects. Use GlasWal™ and TrimWal™ with matching colors to add a look of continuity and style throughout your project. Or combine an assortment of API products in a variety of exciting color combinations to make a bold and dramatic statement.
